[PORTFOLIO HEMAN](#)

CHENNAI – T. NAGAR

SUMMARY

Computer Science postgraduate with hands-on experience in web development and software engineering. Proficient in HTML, CSS, JavaScript, PHP, MySQL, and Python, with experience in full-stack development and building scalable, user-friendly applications

SKILLS

Languages: Python, PHP, JAVASCRIPT, SQL

WebTechnologies: HTML, CSS, Bootstrap, React

IDE: VS Code, Jupyter Notebook

Tools: Power BI, Microsoft Office Products.

Database: MySQL

PROJECTS

Distance Education Admission Management System

 <https://github.com/Heman031/internship-.git>

Tech Stack: HTML, CSS, JavaScript, PHP, MySQL

(INTERNSHIP)

Developed a full-stack web application with multi-role access (Admin, Staff, LSC), implementing features for application processing, document upload, and tracking, with secure data handling using MySQL and session management.

Tourist Travel Booking | Academic Project

 <https://github.com/Heman031/TamilNadu-Tourism.git>

Tech Stack: HTML, CSS, JavaScript, MySQL

(1 month)

Developed a full-stack web application for browsing travel destinations and booking packages. Implemented user authentication, booking management, and dynamic data handling with secure database integration using MySQL.

Student Result Management System | Academic Project

(2months)

Tech Stack: React, CSS, Node.js

 <https://github.com/Heman031/student-result.git>

Developed a web-based application to manage and display student results efficiently. Implemented a responsive frontend using React and CSS, and built backend functionality with Node.js for data handling and processing, ensuring a smooth and user-friendly experience.

Flower Detection Using CNN | Academic Project

 <https://github.com/Heman031/Flower-Detection-.git>

Tech Stack: Python, TensorFlow/Keras, NumPy, Pandas, Matplotlib, OpenCV

(3 months)

- Developed a CNN-based flower classification model to identify multiple flower species.
- Contributed to dataset collection, data preprocessing, and exploratory data analysis as part of a four-member team..

EXPERIENCE

(FINANCIAL FRAUD DETECTION SYSTEM) - Naso Technologies Pvt. Ltd.

[2025 May – 2025 June]

Developed a Financial Fraud Detection system, gaining hands-on experience in data preprocessing, feature engineering, and machine learning, while strengthening analytical skills and contributing to accurate, data-driven fraud identification.

Distance Education Admission Management System – E-Governance Centre, University of Madras

[JAN 2026 – APRIL 2026]

Developed a web-based system to automate student admissions using HTML, CSS, JavaScript, PHP, and MySQL, focusing on secure data handling and efficient workflow management.

EDUCATION

Master of Science in Computer Science | [University Of Madras College](#)

2024 – 2026

Bachelor of Science in Computer Science | [Dhanraj Baid Jain College](#)

2021 – 2024

Secondary Education | [Ramakrishna Krishna mission Higher Secondary School](#)

2018 – 2021
